ABOUT ME

Highly motivated undergraduate student in information technology with strong analytical and problem-solving skills. Seeking internship opportunities and committed to continuous learning. Experienced in creating web applications.I am eager to apply my skills and knowledge in real-world settings and contribute to the technology industry.

- Hands-on experience in creating web applications using the MERN stack , Java and frameworks.
- Effective collaboration with others.
- Familarity with Agile development methodologies.
- Experience with NPM for package management.
- Practical exposure to employing version control systems.
- Familiarity with testing framework such as Postman.

WORK EXPERIENCE

SENSUS HUB PVT LTD
Boralesgamuwa
Jul 2023 - Jan 2024

Software Engineer Intern

• Proficient MERN stack intern with expertise in software development, documentation, and testing
• Contributed to production-level web-based ERP projects for Sri Lankan businesses
• Skilled in the entire software development lifecycle, from design to deployment
• Strong problem-solving abilities, delivering high-quality results within tight deadlines

EDUCATION

SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY
Malabe
2025

Bsc (Hons) in IT specializing in Information Technology

- Pursuing a BSc (Hons) degree in IT with a specialization in Information Technology.
- My academic journey has honed my critical thinking and problem-solving abilities, allowing me to craft innovative solutions for intricate IT challenges.

UNIVERSITY PROJECTS

Mar 2023 - May 2023

Tuition and performance Management System - MERN stack

In a university group project, our team successfully developed a Student Management and Performance System using the MERN stack. This comprehensive system enables educational institutions to efficiently handle student, teacher, and parent records, monitor student performance, and generate insightful reports on academic progress.
Specifically, my responsibilities included :

- Parent management system and show the student progress. https://github.com/vidura-chathuranga/Sysro-Tuition-Management-System.git

Apr 2023 - May 2023

JobSpot Job Seeking Mobile Application - Kotlin, Firebase

As part of a university group project, our team developed a job-seeking mobile app designed to help individuals in economic crises find employment opportunities. The app simplifies the job search and application process, providing users with a direct platform to connect with potential employers. My contribution are as follows :

- Implemented the company side login, register, profile and upload job post.
- https://github.com/vidura-chathuranga/Jobspot-Jobseeking-Kotlin_App.git

Oct 2022 - Nov 2022

Online Bus Reservation System - Java based

Contributed to a team project at university, leading the development of an Online Bus Ticket Reservation System. Designed features for route searching, seat reservation, and ticket price calculation. Implemented admin functionalities for sales and reporting. Applied expertise in Java, OOP concepts, and testing to ensure system reliability and efficiency. Contributions are as follows:

- User Profile Page(update/delete/edit/view) details, Contact Us Page

Apr 2022 - May 2022

Online Voting System for Award Nomination - php, javascript, HTML, CSS

We created an online voting system using PHP for award nominations. Users can easily nominate and vote for their favorites. A unique feature allows companies to customize their own voting programs within our system.
